

Abdelrahman Mohamed

Web Developer

About Me

My name is Abdelrahman Mohammed, intermediate Back-end Developer with Node.js, practiced with integrating 3rd party RestApis into applications, with two years of experiences i've learned much more than it would. On other hand has good knowledge about front-end frameworks like VueJs(Vuex) UI/Ux concepts, designing theories and digital marketing. I'm always challenging myself to consistently keep learning about all related fields but all my concentration at developments. and bulid things.
